

## MOOV Golpeador - Installation instructions

Thank you for purchasing Moov golpeador. In order to fit it on your Moov - travel guitar please follow the next steps:

- 1) On the MOOV Travel Guitar, unscrew the three screws of the central cap and put it out.

- 2) Place the golpeador and screw it with the three longer screws that are included. If you like you can place also the cap above the Golpeador and screw them together but not too tight because the cap is a thin piece of wood and it might break.

- 3) Ready!

For any information or problem please contact us. We will always be at your service.
